

Hala Obeid

604-441-1254 — hoa23@sfu.ca — Vancouver, BC — github.com/HalaObeid04

Technical Skills

Languages: Python, C, C++, Java, SQL

AI & Machine Learning: PyTorch, TensorFlow, scikit-learn; LLMs, transformers, NLP, prompt design and evaluation, supervised/unsupervised learning

Microsoft 365: Excel, Word, PowerPoint, Outlook, Teams; familiarity with Copilot and Power Platform concepts

Data & Databases: SQL, NoSQL (basic), Tableau, Excel; data cleaning, validation, preprocessing

Software Engineering: OOP, debugging, unit testing, Agile, Git/GitHub, Linux, documentation

AI Experience

Sensa — AI Accessibility Tool

May 2026 – Present

- Designing and building an AI-powered accessibility tool for visually impaired women, applying responsible AI principles from the ground up including privacy-by-design, user safety, and ethical considerations for a vulnerable population.
- Leading the computer vision and audio pipeline development in Python using PyTorch, responsible for end-to-end prototyping, testing, and evaluation of model outputs.
- Collaborated with stakeholders and mentors to define user requirements, assess accessibility needs, and incorporate responsible AI principles such as transparency, human oversight, and risk mitigation throughout the development process.

NLP Research Assistant

May 2026 – Present

Simon Fraser University

Burnaby, BC (Hybrid/Remote)

- Evaluating LLM outputs for accuracy, consistency, and bias across culturally nuanced translation tasks, applying rigorous quality and documentation standards throughout.
- Building a structured multilingual dataset and contributing to research documentation, process flows, and evaluation methodology.
- Collaborating with faculty and a multilingual team, communicating technical findings to both technical and non-technical audiences.

AI4Good Lab — Machine Learning Program

May 2026 – Present

Mila — Quebec Artificial Intelligence Institute

Remote

- Applying ML concepts including LLMs, transformers, NLP, and reinforcement learning through a 7-week program exclusively for women, with a focus on real-world and ethical AI applications.
- Delivering weekly end-to-end team ML projects from data preprocessing through model evaluation and presentation to peers and instructors.

Technical Work Experience

Data & Visualization Assistant

Jan – Apr 2025

SFU Computing Science Diversity Committee

Burnaby, BC

- Designed and maintained Excel and Tableau dashboards to track engagement metrics; cleaned and validated datasets ensuring data integrity and accuracy.
- Drafted clear documentation and visual reports translating data requirements from stakeholders into accessible outputs for decision-making.
- Collaborated across research and administrative teams, adapting to competing priorities and maintaining organized, reliable outputs.

Certifications & Training

Cybersecurity Training Program

Apr 2026 – Present

Society for Canadian Women in Science and Technology (SCWIST)

Remote

- Developing expertise in responsible information handling, privacy awareness, threat analysis, and security best practices through a 16-week program by SCWIST and Growth Office Partners.

Other Work Experience

Operations & Administrative Assistant

Jun – Sep 2025

Umbrella Multicultural Health Co-op

New Westminster, BC

- Maintained internal data systems and documentation; handled sensitive community information with confidentiality and care.
- Translated organizational documents from English to Arabic, demonstrating strong cross-cultural communication across diverse communities.
- Coordinated across technical, administrative, and external partners managing multiple priorities in a fast-paced environment.

Education

B.Sc. in Computing Science

Sep 2024 – Present

Simon Fraser University

Burnaby, BC

- Relevant coursework: Data Structures & Algorithms, Introduction to Machine Learning, Database Systems.

Transfer Credits

Sep 2022 – Apr 2024

Kwantlen Polytechnic University

Surrey, BC
